Car Engine Service

In many ways a diesel engine is less complicated than a petrol engine, with greater reliability and a longer working life. There is little difference between servicing a diesel and a petrol engine except that the diesel has no ignition system to worry about. However, the fuel system needs very careful attention, as part of the regular service, to prevent dirt and water in the fuel damaging it.

Diagnostic Trouble Codes Chart | Check Engine Light ...

The purpose of a gasoline car engine is to convert gasoline into motion so that your car can move. Currently the easiest way to create motion from gasoline is to burn the gasoline inside an engine. Therefore, a car engine is an internal combustion engine — combustion takes place internally. Two things to note:

How Car Engines Work | HowStuffWorks

Car engines are designed around sealed, resilient metal cylinders. Most modern vehicles have between four and eight cylinders, though some vehicles can have as many as sixteen! The cylinders are made to open and close at precisely the correct time to bring in fuel to combine with the spark for burning internally, and to release the exhaust gases produced.

Basic Parts of The Car Engine | Sun Auto Service

The service intervals are specified by the vehicle manufacturer in a service schedule and some modern cars display the due date for the next service electronically on the instrument panel. A tune-up should not be confused with engine tuning , which is the modifying of an engine to perform better than the original specification, rather than using maintenance to keep the engine running as it should.

Service (motor vehicle) - Wikipedia

Plastic parts of your engine, such as engine covers and reservoir caps may be difficult to scrub clean. Start by using a stiff toothed, plastic bristled brush along with car wash soap or degreaser. Once the hard to remove grime has been removed, use a sponge with car wash soap to get the last of the grime off before rinsing the pieces with water. [13]
